City Hall  
New York, NY 10007

Hon. Christine Quinn  
Speaker, New York City Council  
City Hall  
New York, NY 10007

Re: Failure of the NYC Department of Homeless Services to report accurate data about homelessness in New York City

Mayor Bloomberg and Speaker Quinn,

We write to express concern about the NYC Department of Homeless Services' continuing failure to report accurate data about homelessness in New York City, in particular the number of homeless people residing in municipal shelters.

As you know, it is vitally important that municipal government agencies report accurate, complete information to New York City residents about major public policy issues like homelessness. The City of New York's agency websites and the City Charter-mandated Mayor's Management Report are two prominent examples of the City's means of communicating vital information to students, the news media, researchers, policymakers, as well as to the general public. And the City has an obligation to ensure that this information is accurate, complete, and free of error.

It is therefore troubling that the City has failed to meet this obligation with regards to information about homelessness. Indeed, in recent years the Department of Homeless Services (DHS) has excluded important data about homelessness in New York City from its website and its publicly-available reports, including the Mayor's Management Report. These incomplete reports create the false impression that the homeless shelter population in New York City is smaller than it actually is.

The following examples illustrate how DHS provides incomplete, misleading data to New York City residents.

1. Inaccurate data reported on the DHS website:

Earlier this winter the DHS website reported that, on the night of January 29, 2010, there were 37,457 "total individuals" residing in municipal shelters (see copy of DHS "Daily Report" for that date enclosed). This figure included 15,839 children and 7,373 single adults.

However, DHS reports obtained by Coalition for the Homeless – reports which are not made available to the general public and which are not posted on DHS's website – report a significantly larger shelter population. (See copies of these reports enclosed.)

<b>NYC Homelessness Data: Comparison of Incomplete NYC Department of Homeless Services Reports and Actual Homeless Shelter Census Reports</b>		
	DHS "Daily Report" 1/29/2010	DHS census reports 1/31/2010
<b>Total Homeless Shelter Population</b>	<b>37,457</b>	<b>39,256</b>
Number of Homeless Families	10,115	10,375
Number of Homeless Children	15,839	16,346
Number of Homeless Adults in Families	14,245	14,757
Number of Homeless Single Adults	7,373	8,153
	Mayor's Management Report, prelim. FY 2010	DHS census reports, FY 2008 and FY 2009
FY 2008 Average Daily Census of Single Adults	6,737	6,850
FY 2009 Average Daily Census of Single Adults	6,526	7,078

For the night of January 31, 2010 – only two nights after the DHS website’s report – the total shelter population was actually at least 39,256 people. This more comprehensive and accurate figure includes 16,346 children and 8,153 single adults. (Unfortunately a direct comparison between both dates is impossible because DHS does not post a “Daily Report” on its website for every day and does not archive past reports.)

Why is shelter census reported on DHS’s website nearly 2,000 people lower than the more comprehensive figure included in non-public DHS reports? This is because the DHS website routinely excludes data about more than a dozen municipal homeless shelters and their residents. The excluded shelters include “safe haven” shelters for long-term street homeless individuals; shelters for homeless veterans; and shelters for homeless families administered by the NYC Department of Housing Preservation and Development (HPD). (Note that data about HPD shelters has been included in every homeless family census report issued by the City since the 1980s.)

On January 31st, for instance, there were 361 homeless people residing in “safe haven” shelters, 375 homeless people in veterans shelters, and 200 homeless families (with 432 children and 421 adults) in HPD shelters. In addition, DHS administers another group of shelters for homeless single adults, called “stabilization beds,” whose data has never been publicly reported, meaning that the actual number of homeless people in municipal shelters is even larger than what is discussed here.

Thus, when the general public, news media, and policymakers visit the DHS website they are falsely informed – even on the site’s home page – that the municipal homeless shelter population is nearly 2,000 people smaller than it actually is. This is the reason why the New York Times and other news organizations have in recent years reported a smaller homeless shelter population than the true number, thus misinforming New Yorkers about the genuine scale of the homeless population in New York City.

## 2. Inaccurate data in the Mayor's Management Report:

The City Charter-mandated Mayor's Management Report (MMR) also includes incomplete, misleading data about the size of the homeless shelter population.

For example, the recently released preliminary MMR for FY 2010 reports that the "average number of single adults in shelter each day" in FY 2008 was 6,737 people and in FY 2009 was 6,526 people, suggesting that the average number of homeless single adults in shelter each night declined by 3.1 percent during that period.

However, like the DHS website, the MMR does not include data for homeless single adults residing in City-administered "safe haven" shelters and veterans shelters. In fact, when data for these shelters is included, the average number of homeless single adults in FY 2008 was 6,850 people and in FY 2009 was 7,078 people. Thus, the average number of homeless adults residing in municipal shelters actually increased by 3.3 percent during that period.

The arbitrary exclusion of data about "safe haven" shelters and veterans shelters is particularly troubling because many of those facilities are actually longstanding municipal shelters for adults that have merely been given a different label and, in some instances, a different service model – and are actually included in past MMR data, thus distorting the historical accuracy and comparability of the City's data. In recent years DHS officials have repeatedly spoken to the news media and at City Council hearings about both "safe haven" and veterans shelters, making their exclusion from the MMR even more puzzling. In addition, as noted above DHS administers another group of shelters for homeless single adults, called "stabilization beds," whose data has never been publicly reported, meaning that the actual number of homeless single adults in municipal shelters is even larger than the figure cited above.

The Bloomberg administration and the City Council have both, on many occasions, lauded the value of basing public policy on data and research, and the importance of measuring the results of City policies and practices. We agree strongly with these principles. And we believe that it does a disservice to New York City residents to provide them with misleading information about major problems like homelessness.

Thus, we urge you to act immediately to ensure that, in the future, the Department of Homeless Services reports accurate, complete data about the homeless population in New York City. In addition, we urge you to ensure that DHS corrects the incomplete, inaccurate data still published on its website and in past Mayor's Management Reports.

Thank you for your attention to this matter. And, as always, we look forward to working with you in the coming months and years to reduce the homeless population in New York City.

Sincerely,

Mary Brosnahan  
Executive Director

Patrick Markee  
Senior Policy Analyst

<b>Individuals</b>	<b>27,431</b>

ADULT FAMILIES CENSUS	
Families	1,277
<b>Individuals (Adults)</b>	<b>2,653</b>

\* As HPD families have been reported separately of the DHS census since October 2005, the Daily Report will no longer include updates as to HPD specific data.

\* Beginning with the 11/5/08 report, DHS is distinguishing Safe Haven capacity from single adult shelter capacity. Safe Havens are a new "Housing First" model targeted to chronically street homeless individuals who have chosen not to enter traditional shelter.

\* Beginning with the 11/5/08 report, DHS is distinguishing the capacity of short-term housing programs for homeless veterans from single adult shelter capacity.

### DHS Families with Children Census

### DHS Adult Family Census

### DHS Single Adult Shelter Census

EMERGENCY  
HOUSING SERVICES  
FOR  
HOMELESS FAMILIES

**MONTHLY  
REPORT**

**January, 2010**

## **HOMELESS FAMILY CENSUS INCREASED BY 219 DHS FAMILIES\*\***

At the end of January, there were 10175 DHS families living in emergency housing in New York City. This represents an increase of 219 lodged DHS families from the end of December. There were 2675 DHS families residing in 59 hotels, 1123 DHS adult families residing in 13 adult residences and 1747 DHS families residing in 11 cluster site facilities.

On January 31, 2010 there were 4630 DHS families housed in 75 Tier II facilities. This represents 45.50% of the total number of DHS families in temporary housing.

A total of 1544\*\*\* DHS families were lodged in the system, who were either newly homeless (609) or had returned after an absence of more than 30 days (935).

### **LENGTH-OF-STAY of DHS FAMILIES\*\*\*** (Excludes conditional placements)

The average length-of-stay (system-wide) for the period ending January 31, 2010 was 248.14 days. The figure increased by 1.33 days from the end of December (246.81 days).

\* This is a snapshot of the last day of the month.

\*\* Does not include HPD families in HPD facilities. Does include DHS families in DHS facilities.

\*\*\* Families are counted once even though they have applied and been placed multiple times within the month.
